eLearning solution beyond technology

Getting the full value from an enterprise LMS software initiative is not easy. While many software companies focus on purely technical or content or delivery aspects of implementation, PrimeBit is different. PrimeBit's unique approach to services proactively identifies and addresses the full spectrum of project risks so customer can be confident that they will fully achieve stated business objectives.

Our experience is reflected in a experience working with rich set of tools, methodologies, and best practices that address three key areas:

Solution Implementation	<ul style="list-style-type: none">• Software implementation & configuration• Customizations & integration with existing systems• Project management• Post deployment support
Organizational Strategy & Governance	<ul style="list-style-type: none">• Governance strategy• Organizational alignment & business process design• ROI modeling & business metrics• Adoption strategy, rollout planning, & change management
Content	<ul style="list-style-type: none">• Interoperability (SCORM / AICC) training & support• Content testing & debugging• Content development strategy, best practices & templates• Custom content development

Organizational Strategy & Governance

What makes PrimeBit Consulting different?

PrimeBit's has unique approach to technology implementation. PrimeBit understands that the biggest risks to the success of technology projects often aren't in the technology domain. They are in the area that we refers to as "governance"—how prepared the organization is to absorb and leverage the technology for the fullest benefit.

Governance issues include

- Establishing realistic objectives and expectations
- Getting stakeholder buy-in through effective change management
- Adapting business processes to the new technology
- Optimizing organizational roles and identifying gaps in skill sets
- Creating alignment and engagement processes across diverse groups
- Developing ROI models to maximize business results
- Establishing a measurement strategy

What We Do

PrimeBit Strategic Services is a team of industry experts with extensive experience in training management, content development, and HR.

Strategic Services has a variety of pre-packaged and custom offerings that will help you...

- Reduce risk
- Speed implementation
- Increase usage

Content Development

Compelling, standards-compliant content is the key to improving the performance of people and organizations. PrimeBit Strategic Services can help you with all aspects of content, including

Content Development—Instructional design, content production, and blended learning

Content Interoperability—Dealing with SCORM/AICC compliance

Enterprise Content Strategy—Implementing best practices for dealing with content across diverse business units and stakeholder groups

Experts at PrimeBit Consulting can help you...

Benefits	Features
Reduce risk	PrimeBit’s technical expertise and extensive deployment experience means that PrimeBit can identify and resolve technical issues quickly and efficiently before they derail your project.
Leverage your existing systems	If you use proprietary software, PrimeBit consultants can analyze your needs and design a data exchange solution that will provide the most functionality with the least amount of effort.
Save time and money	By using PrimeBit Consulting, you will see a return on your PrimeBit investment sooner and you will avoid the high cost of tying up internal resources and dealing with unexpected project delays.
Get the full benefit of your investment	PrimeBit consultants can also help you hide features you don’t need and tailor the user interface to match your organization’s terminology and workflow. Tailoring the system simplifies the learning curve for users and speeds adoption.
